

MOONFANG - OFFICIAL ROADMAP

MOONFANG ROADMAP

888 NFTs on BNB Smart Chain. No rarity - every NFT is identical, every minter is equal. 100% of the $FANG supply is distributed to minters, with no team reserve and nothing held back.

This document clearly separates what is **already complete**, what is **in progress now**, and what **only begins after sold out**. Every figure in this document can be verified directly on-chain.

200 / 888
Total minted as of Nov 12, 2026, 01:35 WIB (22.5%)

200 / 200
Free mint SOLD OUT - all free slots have been claimed

688
Paid NFTs remaining at 0.001 BNB (= 0.688 BNB to sold out)

2,000,000
$FANG already distributed to free-lane minters

15 BNB
Planned initial liquidity for the FANG/BNB pool after sold out

$4
Repost reward per approved wallet, paid after the pool is live

SIX PHASES, ONE GATE: SOLD OUT

Phase 1	Phase 2	Phase 3	Phase 4	Phase 5	Phase 6
Foundation & deployment	Mint open	Bonuses & community	Towards sold out	15 BNB pool	Payout & close

Phases 4, 5, and 6 will not begin before all 888 NFTs are gone. The order is fixed: sold out first, then $FANG distribution is completed, then the pool is created, then repost payouts are paid.

PHASES 1 - 3

What is done, and what is running now

COMPLETE - NOV 11, 2026

Phase 1 - Foundation & deployment

This phase was fully completed before mint opened, so no promise depends on work that does not exist yet.

- The $FANG token was deployed on Nov 11, 2026 at 23:03 WIB, followed by the NFT contract at 23:46 WIB, and the two were linked (setToken) at 23:48 WIB.
- Both contracts are fully verified on Sourcify (exact match) - anyone can read the code.
- The official website is live at moonfang.pages.dev; the mint button follows the mintOpen switch directly from the contract.
- The tweet-bonus permit worker is live, so bonus claims run automatically. The official X account @moonfangBnb is the only announcement channel.

IN PROGRESS - OPENED NOV 12, 2026, 00:55 WIB

Phase 2 - Mint open

Mint opened after the announcement on X. The free lane sold out first, and sales now run purely through the paid lane.

- Free mint: 1 NFT + 10,000 $FANG per Agent ID, quota of 200 - **completely sold out**.
- Paid mint: 0.001 BNB per NFT + 35,000 $FANG, maximum 15 NFTs per wallet, 688 remaining - open while stock lasts.
- There is no rarity and no tier: NFT #1 and NFT #888 are identical.

IN PROGRESS - SINCE MINT OPENED

Phase 3 - Bonuses & community growth

Three programs run while mint is open - two paid in $FANG, one paid in cash USDT.

- **Tweet bonus +5,000 $FANG**, once per wallet: post the template from the website, the system checks the tweet automatically (public, contains #Moonfang and the site link, not previously used), and the claim permit is valid for 30 minutes. A free mint does not require a tweet.
- **Invite +1,000 $FANG** per friend who mints for the first time through your referral link; the inviter must hold at least 1 NFT. The invite cap has been removed.
- **Repost program $4 USDT** per approved wallet (1 per wallet, 1 per X account, must follow @moonfangBnb, following the official copy and 7 rules). Paid in Phase 6, not now.

PHASES 4 - 6

What happens after 888 are gone

NEXT - THE GATE FOR ALL LATER PHASES

Phase 4 - Towards sold out

The only job in this phase is to sell the remaining 688 paid NFTs. No later phase begins before the on-chain figure shows 888 of 888.

- Target: 688 x 0.001 BNB = 0.688 BNB from paid sales to reach sold out.
- Mint progress is published regularly with on-chain figures, not estimates.
- After sold out, the remaining $FANG in the NFT contract is calculated openly: total supply minus all $FANG already distributed and bonuses still claimable.

AFTER SOLD OUT

Phase 5 - FANG/BNB pool on PancakeSwap

After sold out, the project owner adds initial liquidity of 15 BNB manually on PancakeSwap, paired with the remaining $FANG from the contract.

- The $FANG for the pool is taken from the NFT contract via the owner-only recoverTokens function; the mint-fee BNB (maximum 0.688 BNB) is withdrawn via the withdraw function.
- The amount of $FANG paired is determined after sold out, from the balance actually available - not a promised figure from now.
- The $FANG : BNB ratio when the pool is created is what determines the starting price of $FANG. Before this pool exists, $FANG has no market price.
- The 15 BNB comes from the project owner, separate from the mint fees collected.

AFTER THE POOL IS LIVE

Phase 6 - Repost payout & distribution close

This closing phase only runs when three conditions are met in order: 888 NFTs sold out, $FANG distribution complete, and the FANG/BNB pool live.

- Every repost submission is reviewed one by one; approved ones are paid $4 USDT per wallet, sent manually by the project owner and marked as paid.
- The maximum obligation of this program is 888 x $4 = $3,552, and the payout funds are prepared by the project owner before payments begin.
- Once payouts are complete, Moonfang distribution is declared finished: all $FANG is in the hands of minters and in the pool.

APPENDIX

Token economics & contracts

All figures and addresses on this page are on-chain data that anyone can check on BNB Smart Chain. This is the only version of the figures that applies if there is any difference with any promotional material.

Item	Figure / address
Total NFT supply	888 - no rarity, all identical, max. 15 per wallet
Total $FANG supply	31,408,000 (30,520,000 mint distribution + 888,000 invite reserve)
Allocation per mint	Free 10,000 $FANG - paid 35,000 $FANG - tweet 5,000 $FANG - invite 1,000 $FANG
NFT contract	`0x79b0ce8b39c3ed230487172751612b4f631398bc`
$FANG token	`0x69a8aa0399b53cdc245e89ce31738dd2dd3ff68b`
Verification	Both contracts Sourcify exact match - BNB Smart Chain (chain 56)

What this roadmap does not promise: the price of $FANG after the pool is live, an exact sold-out schedule, or any profit. The starting price is determined by the market through the pool ratio in Phase 5, and repost payouts only happen if all Phase 6 conditions are met.

How to check it yourself

Copy the NFT contract or $FANG token address from the table above into a BNB Smart Chain block explorer. There you can see the total minted so far, the $FANG balance still held in the NFT contract, and every distribution transaction - without having to trust this document.

Official progress is only announced via X @moonfangBnb and the website moonfang.pages.dev. Any other account or site using the Moonfang name is not an official channel for this project.
